

AMENDMENTS TO THE CLAIMS

1. (Cancelled)

2. (Currently Amended) A method according to claim [[1]] 7 further comprising:

before locating trace statements, detecting if a trace function is enabled.

3. (Original) A method according to claim 2 further comprising:
detecting if a trace function is enabled includes if the trace function is enabled:

locating trace statements in a source code of the application;

collecting information regarding the trace statements;

outputting the information for viewing by a user; and

and if the trace function is not enabled:

ignoring the trace statements.

4. (Currently Amended) A method according to claim [[1]] 7 wherein:

outputting includes organizing the information according to predefined organizational attributes.

5. (Currently Amended) A method according to claim [[1]] 7 further comprising:

collecting server control information;

1 collecting cookie information;
2 collecting header information; and
3 collecting server variable information.

4
5 6. (Currently Amended) A method according to claim [[1]] 7
6 wherein:

7 outputting the information includes outputting the information to a bottom
8 of a page for viewing by a user.

9
10 7. (Currently Amended) A method of collecting runtime information
11 for an application in a computing system, the method comprising: A method
12 according to claim 1 further comprising:

13 locating trace statements in a source code of the application;

14 collecting information regarding the trace statements;

15 outputting the information for use by a user; and

16 detecting if the information should be output to a separate application;

17 if the output should not be to a separate application then outputting
18 the information to a bottom of a page for viewing by a user; and

19 if the output should be to a separate application then outputting the
20 information to the separate application.

21
22 8. (Original) A method according to claim 7 wherein:

23 outputting the information to the separate application includes outputting
24 the information to a separate web page.

1 9. (Currently Amended) A method according to claim [[1]] 7
2 wherein:

3 collecting information includes collecting ~~when the a request occurred~~ ^{As}
4 occurrence time, ~~what was the an~~ http status code, and ~~what was the a~~ request
5 type.

6
7 10. (Canceled)

8
9 11. (Currently Amended) A system according to claim [[10]] 16
10 further comprising:

11 a detect module that detects if a trace function is enabled.

12
13 12. (Original) A system according to claim 11 further comprising:

14 a compile operation that ignores the trace statements.

15
16 13. (Currently Amended) A system according to claim [[10]] 16
17 wherein:

18 the output module organizes the information according to predefined
19 organizational attributes.

20
21 14. (Currently Amended) A system according to claim [[10]] 16
22 further comprising:

23 a server module that collects server control information;

24 a cookie module that collects cookie information;

25 a header module that collects header information; and

1 a server module that collects server variable information.

2
3 15. (Currently Amended) A system according to claim [[10]] 16
4 further comprising:

5 a page module that outputs the information to a bottom of a page for
6 viewing by a user.

7
8 16. (Currently Amended) A system for collecting runtime information
9 for an application in a computing system, the system comprising: ~~A system~~
10 ~~according to claim 10 further comprising:~~

11 a locate module that locates trace statements in a source code of the
12 application;

13 a collect module that collects information regarding the trace statements;

14 an output module that outputs the information for use by a user;

15 a detect module that detects if the information should be output to a
16 separate application; and

17 a separate module that outputs the information to the separate application.

18
19 17. (Original) A system according to claim 16 wherein:

20 the separate module outputs the information to a separate web page.

21
22 18. (Currently Amended) A system according to claim [[10]] 16
23 wherein:

24 the collection module collects ~~when the~~ a request occurred occurrence time,
25 ~~what was the~~ an http status code, and ~~what was the~~ a request type.

1
2 19. (Cancelled)

3
4 20. (Currently Amended) A computer process according to claim
5 [[19]] 25 further comprising:
6 before locating trace statements, detecting if a trace function is enabled.

7
8 21. (Original) A computer process according to claim 20 further
9 comprising:

10 detecting if a trace function is enabled includes if the trace function is
11 enabled:

12 locating trace statements in a source code of the application;

13 collecting information regarding the trace statements;

14 outputting the information for viewing by a user; and

15 and if the trace function is not enabled:

16 ignoring the trace statements.

17
18 22. (Currently Amended) A computer process according to claim
19 [[19]] 25 wherein:

20 outputting includes organizing the information according to predefined
21 organizational attributes.

22
23 23. (Currently Amended) A computer process according to claim
24 [[19]] 25 further comprising:

25 collecting server control information;

1 collecting cookie information;
2 collecting header information; and
3 collecting server variable information.
4

5 24. **(Currently Amended)** A computer process according to claim
6 ~~[[19]]~~ 25 wherein:

7 outputting the information includes outputting the information to a bottom
8 of a page for viewing by a user.
9

10 25. **(Currently Amended)** A computer program product readable by a
11 computing system and encoding instructions for a computer process for collecting
12 runtime information for an application in a computing system, the computer
13 process comprising: A computer process according to claim 19 further comprising:

14 locating trace statements in a source code of the application;

15 collecting information regarding the trace statements;

16 outputting the information for use by a user; and

17 detecting if the information should be output to a separate application;

18 if the output should not be to a separate application then outputting
19 the information to a bottom of a page for viewing by a user; and

20 if the output should be to a separate application then outputting the
21 information to the separate application.
22

23 26. **(Original)** A computer process according to claim 25 wherein:
24 outputting the information to the separate application includes outputting
25 the information to a separate web page.

27. (Currently amended) A computer process according to claim [[19]]

25 wherein:

collecting information includes collecting ~~when the~~ a request ~~occurred~~
occurrence time, ~~what was the~~ an http status code, and ~~what was the~~ a request
type.
